

UGC-Series – Twin Wall Underground Burial Conduit Product Specification Sheet

Twin-walled underground burial conduit has a corrugated exterior and a smooth interior core. Manufactured from HDPE by a twin-extrusion process, two pipes are extruded simultaneously (one inside the other) and heat-welded in one continuous process.

Its flexibility and mechanical resistance allows installation even in the presence of irregularity in the ground as well as having high resistance to chemicals and water ingress.

All coils of UGC-Series are supplied complete with draw-cord pre-installed throughout and one conduit coupler per coil.

Technical Details

Material: HDPE (High-density polyethylene)

Colour: Black

Approvals: BBA Approved

Other Information: Excellent impact resistance at low temperatures

Manufactured to Highways specification & BS EN 61386

Product Code	Trade Size	Internal Diameter	External Diameter	Coil Size
UGC-040	40mm	32mm	40mm	50m
UGC-050	50mm	40mm	50mm	50m
UGC-063	63mm	50mm	63mm	50m
UGC-110*	110mm	94mm	110mm	50m
UGC-160*#	160mm	137mm	160mm	25m

* Collection only due to bulky size. Delivery available for bulk quantities, please enquire for further information.
Non-stocked special order only.
